

Agrocalypse

OMG!

"Look, what's that
on the horizon?
Are those...
people?"

These are not people...
They are coming back,
again!
We need to prepare!"

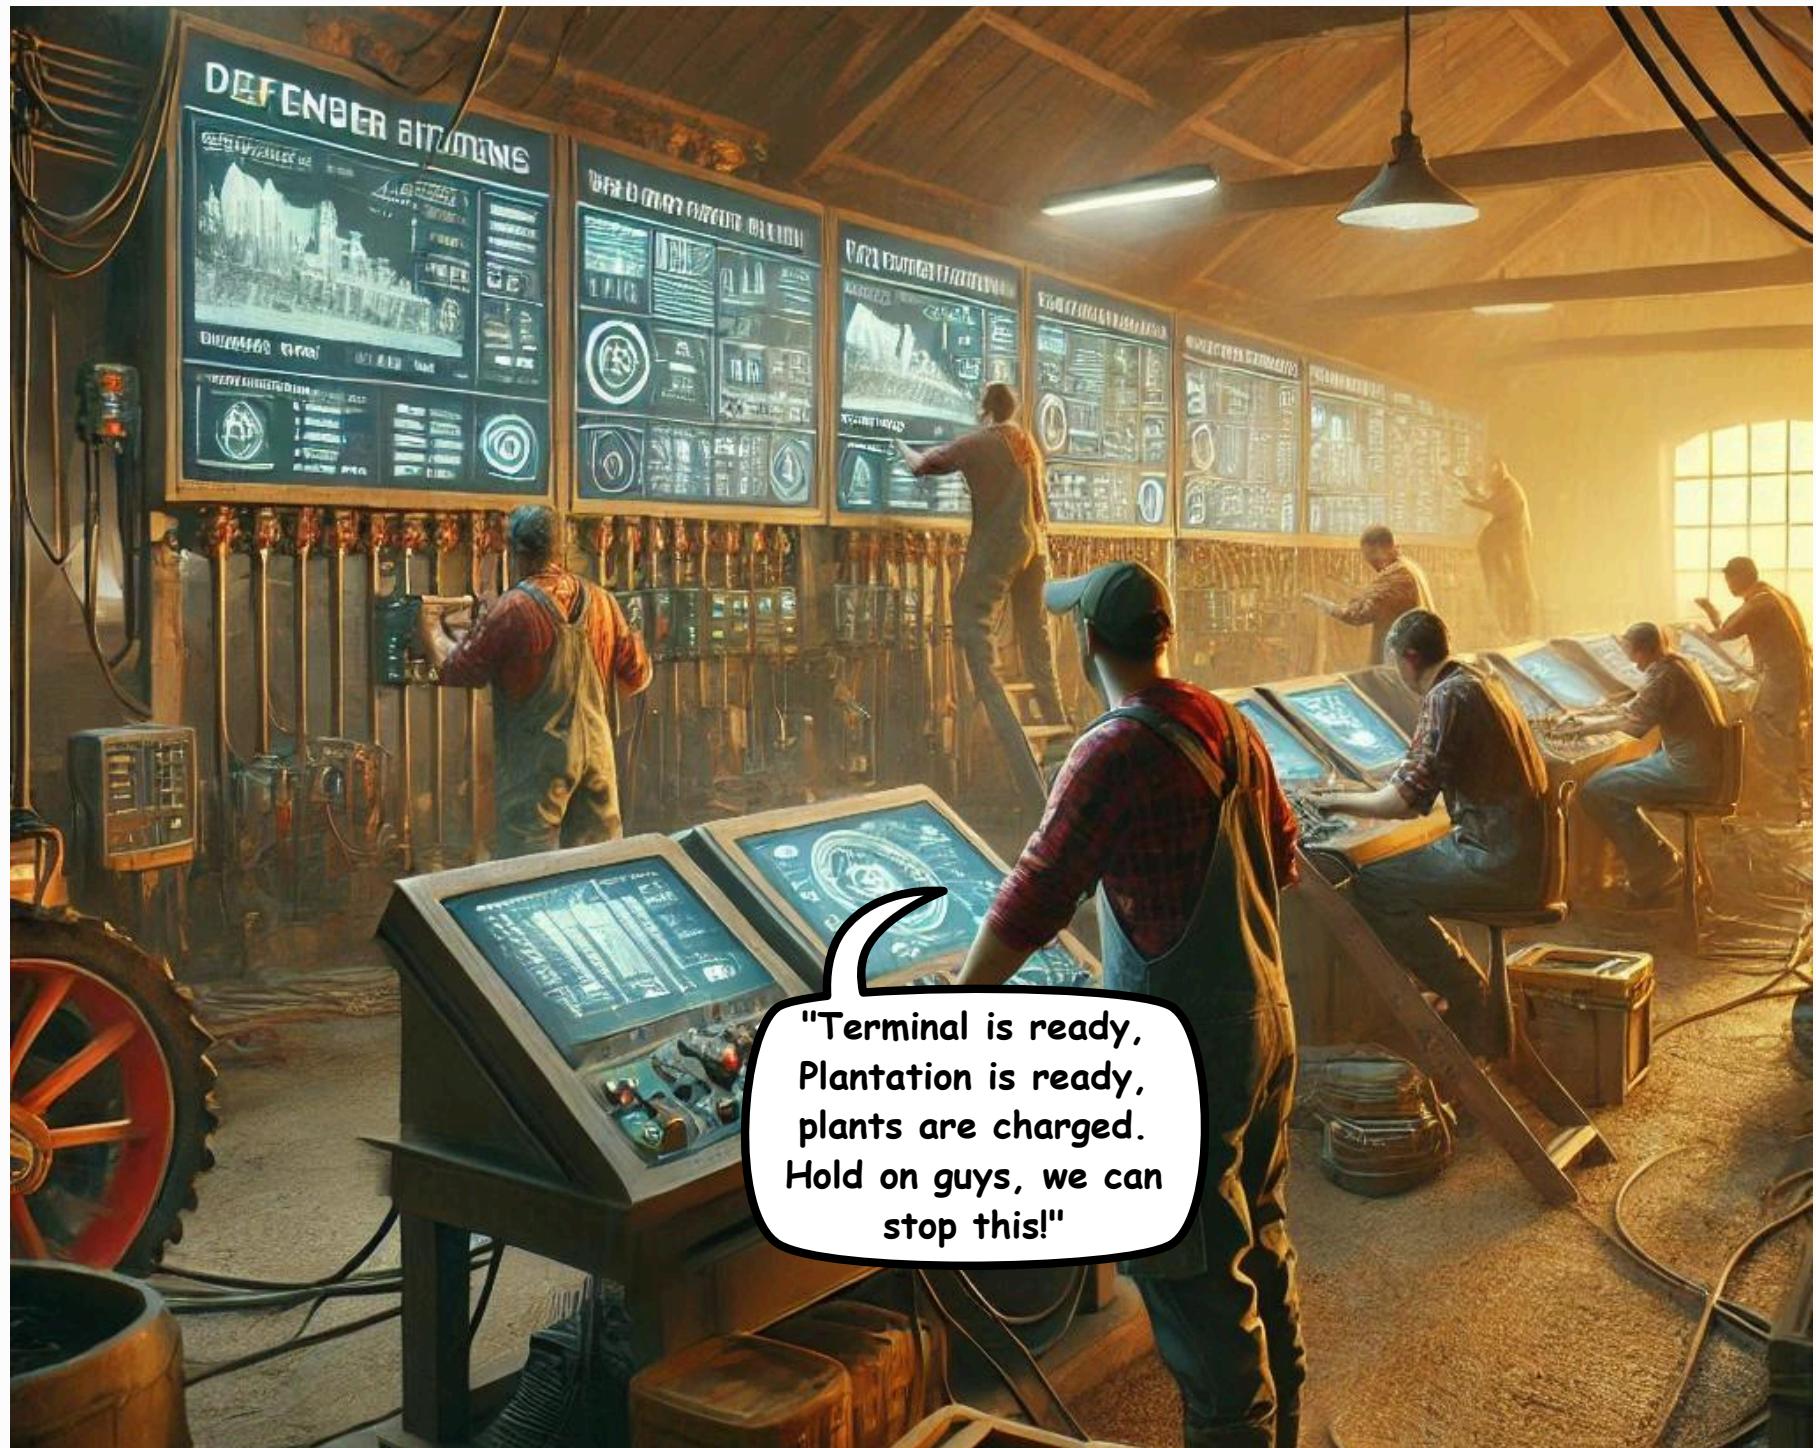

"Are you sure this
thing will work?
These plants look
weird..."

"They're approaching the terminal! Just a few more minutes and they'll get there!"

"If they destroy the terminal, our modified plants will be left without protection... We must hold our ground!"

"Terminal is ready,
Plantation is ready,
plants are charged.
Hold on guys, we can
stop this!"

"I can't believe my eyes!
These sunflowers... are
they shooting?!"

"They are not just
plants anymore. We
have turned them into
our protectors!"

"Our modifications will work. These zombies won't even get to us!"

"Look at this! Our plants are repelling their attack. No one will get through!"

"They're running!
We've finally driven them away!"
Scientist: "We've won... nature
is on our side!"
